With AGCO acquiring 80% of Trimble Ag and re branding to PTx Trimble, TractionAG is in a position to offer sales and support for your Trimble guidance and precision ag systems. Previous Trimble dealers have indicated that they want nothing to do with supporting Trimble products therefore we have taken on PTx Trimble to keep our current and new customers running and up to date.

We are offering the following :- RTK corrections via NTRIP Modem (2.5cm)

- Rangepoint RTX (15cm)
- Centerpoint RTX (2.5cm)

TractionAG value our relationship with customers.

To further enhance this, we are establishing a Precision Ag health check.

Our aim is to support your existing guidance platforms and to ensure you are getting the best performance out of your technology.

The service will include:

- Software updates
- Backing up of all farm data
- Clearing out any unwanted data
- Tune & test the machine
- Refresh screen functionality to ensure you're getting the most out of your screen

We are offering this service for **\$400pa** on all of your guidance systems that Traction Ag currently support within 100km of each dealership:

- Fendt Varioguide
- MF Guidance
- Trimble
- TOPCON

If you are unsure of where you stand with your guidance equipment, give Traction Ag a call.

Call **Brenton on 0497 838 524** or **Shaun on 0407 337 490**

to arrange an on farm visit today!
